

**NEW**

# AX Series XLR Chassis

**Amphenol Australia**

The AX series chassis mount connectors feature improved 360° grounding with a four-point rivet for durability and strength.

The compact housing with reduced latch height is a perfect fit for space saving designs and reduces accidental damage to the latch. With a vast range of options available including 3 to 6 contacts, 3mm threaded mounting, solder bucket or vertical PCB contacts.

Contact your Amphenol stockist today and move to the next level in connector quality and performance.
